The Distributed European School of Taxonomy (DEST, http://www.taxonomytraining.eu), originally funded by the EC in
the framework of the EDIT project, has launched two types of training courses at various European research facilities and
universities.

The programme is open to participants from Europe and from outside of Europe. The Modern Taxonomy programme
2013-2014 offers intensive theoretical courses in subjects as varied as nomenclature and DNA-barcoding. The Expert-in-
training programme 2013-2014 enables graduate students and early career researchers to develop and strengthen their
taxonomic research skills through on-the-job-training. The programme includes a great diversity of topics and covers various
groups such as diatoms, rotifers and tropical plants.
