

Anne S. Chatham Fellowship in Medicinal Botany

Contributed by hcacanindin on Sep 08, 2017 - 03:27 PM

The Garden Club of America's Anne S. Chatham Fellowship in Medicinal Botany provides at least one grant award of \$4,500 annually to support research related to medicinal plants. An important aspect of the award is that it is intended to enable a student to pursue an avenue of research that might otherwise prove closed. Accordingly, the funds may be used to cover direct costs associated with travel, field studies, or laboratory research. However, fellowship funds may not cover indirect costs, overhead, or student stipends and should not be used to pay for lab space or supplies normally provided by universities. Eligible candidates include U.S. citizens or permanent residents who are currently enrolled in PhD programs in U.S.-based institutions, in any field of specialty, or who have received a doctoral degree within the last five years.
